Opinions expressed by Entrepreneur contributors are their own. You're reading Entrepreneur India, an international franchise of Entrepreneur Media. Hassle-free documentation is an alien concept for us. The thought of getting a legal document, be it rental agreements, contracts, MoUs, registration can be a nightmare. The never-ending proceduresand paperwork makes many criticize the cumbersome process, with many trying to find out ways to jump the queue. Figuring out the need for a smooth documentation process, LegalDesk.com, a two-year-old start-up has solutions for this pain point. A do-it-yourself platform, LegalDesk.com offers a "review, print and deliver with stamp paper" service to ease out the tedious work. The services are currently available across India and over 3,000 users visit the website everyday. Entrepreneur talks to its co-founders Ashok Kadsur & Krupesh Bhat to find out more. Entrepreneur India How have you evolved as a legal start-up?We initiated about two years ago and assembled few simple, but most commonly used forms including rental agreement and affidavits. Within six months, we added 50 documents to our pool ranging from HR policy to Power of Attorney and personal will. We evolved from bare shell "downloadable soft copy" service to complete "review, print and deliver with stamp paper" service, which is currently available across India. About 12 per cent visitors are from outside India.How aware are start-ups today about legal aspects of entrepreneurship?The start-up boom has led to mushrooming of entities. Budding entrepreneurs lack awareness about the legal process and documentation involved in incorporating an entity and the formalities involved after incorporating the same. This gap further escalates as hiring a law firm or in-house legal team is an expensive affair.How does the DIY platform, offered by you, work?We have initiated a new model called "Do-it-Yourself Legal Drafting". LegalDesk.com provides guidance at any stage of the document-making process. Subsequently, we print out the document on stamp paper and deliver it to the individual. All the services available are economical, comparably much cheaper to the feeotherwise charged by lawyers.What is the e-signing product all about?We are planning to launch an Aadhaar-based e-signing product to verify legal documents. The eSign concept is basically an electronic signature powered by Aadhaar. Now, multiple parties can sign the document instantly anywhere, anytime. Your eSign is as authentic as your regular signature. Even the Government of India has authenticated its usage. Once you sign an agreement using eSign service,you can invite other parties to sign the document online instantly to make the agreement legally binding.What are the legal packages for startups?At LegalDesk.com, we offer two Legal packages for start-ups – first, Business Documentation Pack and second, the Incorporation Pack. The Business Documentation Pack caters to the need of entrepreneurs with respect to Business documentation. This pack is segregated in three different sections which can be selected asper requirement. On the other hand, the Incorporation Pack caters to the requirements of entrepreneurs who want to get their entity registered.This article first appeared in the Indian edition of Entrepreneur magazine (August 2016 Issue), if you are looking for a totally unique digital stamp to add to your next crafting project, how about making a portrait digital stamp from a photo. There are many reasons why you might want to create a digital stamp portrait from a photo. Here are few: A digital stamp is black and white. Therefore it is cheaper to print than a full-color photo. This makes a digital stamp a perfect option if you are creating multiple versions of a card or invitation. You can color the digital stamp using marker pens, pencils, or paints. Go to town with colors and experiment. You'll be able to create effects ranging from pop art to realistic. The black-and-white digital image can be used to create a rubber stamp. This is a great option if you wish to stamp the same image over and over again without printing it. It is also ideal for teachers who may want to personalize their comments to students with a stamped image. You can offer a custom digital stamp service as a gift for friends and family or even sell them. To make a digital stamp portrait from a photo, you can use one of two methods: one using Photoshop and Photoshop Elements, and the other using the free software alternative, called GIMP. If you're interested in creating this effect but don't have a copy of Photoshop, go to GIMP.org. GIMP is a free and open-source image editor that is generally considered to be the best free alternative to Photoshop. This fun technique in the tutorial below gives a photo a rubber stamp effect using Adobe Photoshop or Photoshop Elements. We may be using an older version of Photoshop, but you should be able to follow along without too much difficulty using most versions. This tutorial basically makes use of just a single tool to create the effect, and that is the Threshold adjustment or filter. Assuming you've got your copy of Photoshop or Photoshop Elements open, let's get started by grabbing and opening the photo you want to work with. Go to the drop-down File menu and click to on Open and then you can navigate to wherever your photo is saved.Double-clicking on the photo file will open it in Photoshop. The Spruce / Kate Pullen Next, we'll keep your image open and select the Threshold filter.If you're using Photoshop Elements, go to the Filter menu and then from the Adjustments sub-menu, select Threshold.In Photoshop, go to the Image menu and select Threshold from the Adjustments submenu.If you prefer using Adjustment Layers, you could also use the Threshold tool this way as the technique is just the same.With the Threshold tool open, you should see your photo turn to black and white. It helps to have insight to how the Threshold filter works. If you imagine a scale of 0-100, with zero being pure black and 100 being pure white, all the pixels in the image are turned black or white depending on how light or dark they are. When the Threshold tool is first opened, all pixels with a lightness value of 50 or less are converted to black, and all the others are converted to white. The Spruce / Kate Pullen The Threshold tool is simple to use because it really only has the one control: the slider below the histogram. Just drag the slider control to the left or right and see how it affects the photo.If you drag to the left, the overall the photo will get lighter because there are more pixels to the right of the slider and all pixels to the right are turned white.Moving the slider to the right has the opposite effect, with more black pixels being added to the image.For our sample photo, we've moved the slider just a little to the right. It's barely noticeable in the accompanying image by looking at the slider, but if you look at the Threshold Level box, the value has increased from 128 to 132.Dependng on your photo, you may have to make a more dramatic change in either direction. It really can vary quite widely from photo to photo. When you're happy with the result, just press the OK button to apply the change. You can now use your image as your personalized digital stamp or print it out for multiple uses. The histogram is a graph-like representation of how dark and light pixels are distributed throughout the photo. The Spruce / Kate Pullen Postal Stamp Requirements First-Class vs. Priority Mail US... The illustrations perfectly highlight the issues Over the years, there has been some delightful postage illustrations (opens in new tab)featured on stamps across the world. Whilst some celebrate annual holidays and other honour an inspirational figure, they can also be used to raise awareness of important issues.Here, French designer Maxime Francout (opens in new tab) has illustrated a series of stamps, which aim to highlight environmental degradation in Canada. Creating minimalist and powerful images through patterns, typography and abstract drawings, it's a gorgeous example of his work.Inspired by skateboards, hip-hop, plants, minerals and black coffee, the pastel aesthetic really make these stamp designs pop. Cleverly integrating the issues into the scenario also make for a marvellous project. Take a look at the designs below.Have you seen any inspiring stamp designs?
